

(Right-back view)

How close do you think the tip of the oar is from the water?

a. close?

b. very close?

c. not very close?

Picture 2: Looking at the same picture from a different viewpoint, would you keep your answer the same or change your answer?

- a. close? b. very close? c. not very close?

Scroll to the next picture to look at the pictures side by side.

When you only look at one viewpoint – the Indian from the right-back, the oar tip appears to be close to the water. When you look at both viewpoints, the right-back and the front, you can see that the oar tip is **not** close to the water. The first step in critical thinking is to try and see things from all points of view.
